

A Premium Void Fill Packaging System

Protecting Products Through Premium Packaging

Stand with Bin

HV Basket

Custom overhead delivery system

EFFICIENT:

Quickly inflates rolls of presealed and perforated stock into a lightweight clear void fill packaging material. This effective and cost efficient, on-demand packaging system allows you to produce a strong quality void fill cushioning as needed. Protecting your products with the Cushion Fill material has never been easier.

FLEXIBLE:

Automatically fills plastic bins for delivery to your packaging stations. Just-in-time high volume dispenser bins/carts can be used at the side of conveyors or at your packaging stations. Optional overhead delivery systems can be designed to deliver the Cushion Fill inflated air bags where required.

EASY TO USE:

Feed the edge of the Cushion Fill Film into the machine and start producing with out a missed bag. The built in photo eye ensures that you have a consistent supply of void fill cushions.

RELIABLE:

Teflon® coated steel belts have a long life expectancy and require little to no maintenance. No-Blade technology makes for easy use. No worries of dull blades or continuous jamming.

FILM SPECIFICATIONS:

- 8" (w)* with perforations at 5", 8" & 10"
- 10" (w)* with perforations at 5", 8" & 10"
- 12" (w)* with perforations at 5" (two tubes per perf)

* Heavy duty film is available along with custom sizes and printing in small quantities.
